Welcome to the Course

Thank you for joining this course!

Before we begin, these are the basic requirements for this course:

Prior knowledge	This course requires no previous experience with Codex. While optional, experience with programming in general can help.
Programs & setup	Students can follow along with Codex and any code editor (such as Visual Studio Code). Note that use of Codex requires a premium subscription. Node.js version 18 or higher is needed in order to run the project files. **The setup of a code editor is NOT covered in this course. However, you can find basic setup information for Visual Studio Code here.**
